

SIDDHARTH SUD

FPV PILOT AND TECHNICIAN

ABOUT ME

Highly motivated self-taught FPV drone pilot and technician. Flying and filming for over five years. Ability to manage multiple facets of a project single-handedly. From building my own drones to flying, filming, and editing my own videos. Knowledgeable about the latest developments in the field and active in local communities of similar hobbyists.

2019 - 2022

- Learnt building and flying FPV drones through videos on YouTube and content on the internet.
- Organised and executed shoots at car rallies and motocross events in diverse locations such as the Himalayas.
- Gained experience and built a portfolio.
- Worked on post-production editing (basic level).

2022 - PRESENT

- Working in DroneAcharya Aerial Innovations, Pune.
- Established and developed the FPV department from inception, overseeing all aspects of its set up and operation.
- Managed projects from conception to completion, including flying demonstrations to the Northern & Western Commands and Para Special Forces of the Indian Army.
- Trained military personnel in flying Kamikaze drones for battle and surveillance scenarios.
- Designed and assembled custom X8 9 inch cine-lifter drones to meet specific military requirements.
- Demonstrated anti-piracy drones for the Indian Navy and assembled surveillance FPV drones currently being acquired by the Indian Army.
